

10×RNase R Reaction Buffer GMP-grade

Product Description

This product is optimized and efficient for digesting all linear RNA by GMP-grade RNase R. It is mainly composed of buffer, salts and magnesium ions required for enzyme proteins.

This product is produced in accordance with GMP regulations and provided in liquid form.

Components

Components	Name	14616ES02	14616ES03	14616ES08	14616ES10	14616ES60
14616ES	10×RNase R Reaction Buffer GMP-grade	500 μL	1 mL	5 mL	10 mL	100 mL

Shipping and Storage

The product is shipped with dry ice and can be stored at -25 ~ -15°C for two years.

Note

Please operate with lab coats and disposable gloves for your safety.
